Augustine & Company

ESTABLISHED 1867

NORMAL, ILLINOIS

NURSERYMEN LANDSCAPE GARDENERS

The Name AUGUSTINE & CO. Stands for Quality Stock
PRICES SUBJECT TO CHANGE WITHOUT NOTICE

FOUNDATION PLANTING

This view will illustrate to you the value of a few shrubs, well selected, and properly arranged for foundation planting. Can you imagine the barren scene presented before the home-lover consulted the Landscape Architect? The house must be framed and tied to its environment, made to look as if it belonged to just the one place it stands. This can only be done with foundation planting of shrubbery.

Considering the cost of such work as illustrated can you conceive of any place where a few dollars could be more judiciously expended, to reap more comfort and enjoyment to yourself, your neighbors, and the public? Furthermore, each succeeding year the charm and beauty increases in value, as money at compound interest, and enhances the value of your home correspondingly.

We make no charge for plans and specifications where we supply the planting material. Our stock is grown to the highest degree of perfection, thrifty, vigorous stock, that will attain a wonderful flower and foliage effect the first season, and when our plans and instructions are complied with, are guaranteed to grow.

Our plans and directions are simple and direct, easily read and understood and anyone can enjoy the pleasure of planting and developing their property with perfect safety.

AUGUSTINE TREES AND SERVICE

TRIMMING TREES

We have had so many inquiries about trimming trees from our customers that we will in the future where requested on the order, trim a sample tree of the order as a guide. Either peaches, apples, plums, pears or other fruits.

TRANSPLANTING

Be sure and get your transplanting guide free. A small folder of condensed practical information, which if you follow carefully, will insure successful transplanting. A copy is packed in each order.

AUGUSTINE TREES

When you buy Augustine Trees you buy more than the trees. You buy a service of growing, handling and packing stock that is an accumulation of more than fifty years experience as practical Nurserymen, Landscape Gardeners and fruit growers.

DO YOU KNOW

In the last ten years the number of fruit bearing trees in the Middle West has decreased nearly one-third and there are but little over half the young trees in orchard not yet bearing there were ten years ago. When you consider this fact as developed by the census and remembering that of all agricultural pursuits the fruit grower is the one whose product has held up in price during the past years, one does not have to question whether it is worth while to plant fruit.

One bushel of good apples will pay for three or four apple trees.

Three cans of peaches will pay for a peach tree.

Three cans of pears will cost as much as a pear tree.

Two pounds of grapes will sell for as much as a grape vine costs.

If you are going to have fruit in your home and you must have it and plenty of it or pay more than it costs for Doctor's bills, the only way to be sure of it is to plant. Home grown fruit is always fresher and better than anything you can buy.

PRICES

The prices quoted herein are for stock packed and delivered on cars at Normal. Cash with order.

SIZE OF PLANTS

Two to three foot plants mean plants two feet in height.

Three to four foot plants mean plants three feet in height.

When plants are ordered three feet in height the price is for three to four foot plants. When ordered two feet in height the price is for two to three foot plants. There is positively no variation from this rule, as all stock is graded and priced in accordance with it.

FRUIT TREES AND PLANTS

APPLES AND CRABS

	Each	10	100
5 to 7 feet, first grade.....	1.00	9.00	85.00
4 ½ to 6 feet.....	.90	8.50	80.00

Rugosa Roses

JAPANESE ROSE—Rosa Rugosa

- Red or White, bloom all summer. Each 10
 Extra heavy plants..... .80 7.00
 Medium heavy plants..... .60 5.00
 F. J. Grootendorst—Carnation red, blooms early spring until frost in great clusters. A new class of rose. Each, \$1.25.

Rosa Hugonis

- Hugonis Rose—The Golden Rose of China. Blooms three weeks earlier than most other Roses. Every branch of the previous years growth becomes lined on both sides, to the very tip, with closely set, wide open, single flowers, like dainty yellow hollyhocks and the branches bend over with the weight of bloom. For shrub planting makes a beautiful bush about 6 feet in height and diameter when fully matured. Blooms from first of May until June.....
